

MATH 150/GRACEY

Extra-credit Assignment

DUE WHEN WE TAKE EXAM 4

Write a typed, at least one page analysis of a topic or topics that you missed on the first or second exam.

When performing this analysis, consider the following questions:

1. What "wrong thinking" caused you to miss and/or leave this item blank?
2. How did you come to understand the topic?
3. How would you teach this topic to some who was not in Calculus yet?

Please use 12 point font, 1 ½ spaced, one inch margins, and include diagrams, sketches, etc. on a separate page. If you would like, you may show how you incorrectly worked the problem next to a correct way of working the problem on a separate page. This assignment may raise your grade on the exam that you choose at most 10%. If you do not write at least one page of analysis (in words), you will not receive full credit.
