

MATH/SHANNON MYERS

Reflection Assignment

DUE AT THE BEGINNING OF CLASS ON OUR NEXT EXAM DAY

Write a typed, **at least** two page analysis of a topic or topics related to the current course material that are either interested in learning more about, or are in need of further clarification. When performing this analysis, consider the following questions:

1. What is the history behind this topic?
2. How did you come to understand the topic?
3. How would you teach this topic to someone who is not in this math class yet?
4. How will you manage your time when preparing for this exam? Are you managing your time appropriately for this class?
5. Feel free to reflect on your experience in this class and/or discuss any other relevant topics and/or life circumstances that may have affected your ability to succeed on this exam and/or in this class.

Please use 12 point font, 1 ½ spaced, one inch margins, and include diagrams, sketches, etc. on an additional separate page (not as part of your two page analysis). This assignment may raise your exam grade at most 5%. If you do not write at least two pages of analysis (in words), you will not receive credit.
